

## Sapphire Wafer Carriers

Insaco offers a range of multiple hole wafer carriers made from sapphire for GaAs and other semiconductors. The carriers offer several advantages over quartz, including higher thermal conductivity and melting temperature and much greater hardness and scratch resistance. Sapphire is also chemically resistant to all reagents used in processing.

The custom wafers are typically manufactured with an optically clear finish, and can be specified in a range of geometries and hole diameters.

## Stable Ozone Sensing

Capteur Sensors and Analysers claims their new ozone sensor can detect concentrations from 15 ppb to 1 ppm. The LG ozone sensor incorporates Capteur's proprietary thick film technology and is stable against the influence of relative humidity and

most other atmospheric pollutants in a wide range of ambient temperatures.
